

Sustainability Statement - Think6

At Think6, we recognise our responsibility to operate in a sustainable and environmentally responsible manner. We are committed to integrating sustainable practices throughout our business operations and supporting our clients and communities in achieving positive environmental, social and economic outcomes.

We strive to minimise our environmental impact by reducing unnecessary travel, promoting digital-first communication and project delivery, and encouraging the efficient use of resources within our day-to-day operations. Where travel is required, we seek to maximise efficiency by combining meetings and activities where possible and making use of virtual meeting platforms to reduce carbon emissions.

As a business working closely with communities, tourism organisations, public sector bodies and environmental projects, we actively support initiatives that promote environmental awareness, biodiversity, sustainable tourism, climate resilience and responsible resource management. We believe that education, collaboration and community engagement are essential to creating lasting positive change.

Think6 is committed to:

- Reducing waste through digital working practices and responsible procurement.
- Supporting local suppliers and businesses wherever possible.
- Promoting sustainable tourism and responsible visitor experiences.
- Encouraging environmentally conscious behaviours within our team and among our stakeholders.
- Supporting projects that contribute to environmental protection, biodiversity enhancement and community wellbeing.
- Continuously reviewing our operations to identify opportunities for improvement in sustainability performance.

We recognise that sustainability is an ongoing journey and are committed to continually improving our environmental practices while delivering high-quality services that create positive social, economic and environmental impacts for the communities and organisations we support.
